

Oddział Gdański Polskiego Towarzystwa Geograficznego
Wydział Nauk o Ziemi Gdańskiego Towarzystwa Naukowego

Serdecznie zapraszamy na otwarte spotkanie naukowe

05.11.2026 (czwartek) godz. 17⁰⁰

Uniwersytet Gdański, budynek Wydziału Nauk Społecznych i jednostek geograficznych
Gdańsk, ul. Bażyńskiego 4, aula S207
i formie zdalnej (MS Teams): [link](#)

From moraine to moraine to understand glacial landscapes and climate change

dr Vincent Rinterknecht

(CEREGE, Aix-en-Provence, France)

Dr Rinterknecht works at the **C**entre de **R**echerche et d'**E**nseignement des **G**éosciences de l'**E**nvironnement (CEREGE) in southern France. For his research, he uses, among others, the terrestrial cosmogenic nuclide (e.g. ^{10}Be) technique. Over the last 25 years, his professional journey took him to destinations such as Poland, Sweden, France, Greenland, Canada, Kyrgyzstan, Sikkim, Patagonia, and Antarctica. With colleagues, he collected hundreds of rock samples to time the retreat of glaciers around the world. During this presentation we will find out what some of the glacier individual stories are telling us.
